

New SKROSS app connects travelers across the globe

By **Hibah Noor** on August, 18 2015 | Technology

SKROSS has developed an app for travelers that gives information about which adapter is required in which country.

Once installed on a smartphone, the app can be used at any time, even in offline mode, as an internet connection is not needed.

The app also provides interesting facts about your destination, such as the capital city, dialing code and currency.
