Mavala's Nutri-Elixir Anti-Age Nutrition Absolute Night Balm is said to lipid-replenish the skin and re-densify it

Swiss supplier Mavala has introduced a new Nutri-Elixir anti-age skincare range.

The Swiss-made range for dry or mature skin is described as lipid-replenishing skincare that is scientifically proven and dermatologically tested.

The products are said to improve the natural lipid replenishment system of the skin thanks to a patented pro-lipid booster, re-moisturizing the skin with nutri-protective lipids thanks to Swiss linseed oil particularly rich in omega 3, 6 and 9.

The ingredients are combined with a complex of bioactivated vegetal oils to smooth skin and help reduce the signs of ageing.

The products are made without mineral oil, phthalates, or sodium laureth sulphate.

Anti-Age Nutrition Absolute Night Balm (65ml tube) is a fine cocoon-like balm that lipid-replenishes the skin and re-densifies it. Skin recovers bounce, comfort and elasticity.

The Ultimate Cream (45ml airless pump tube) for Face and Eyes is a lipid-replenishing and fortifying skin fusion day and night cream that provides silkiness, glow and elasticity. Also tested ophthalmologically.

Anti-Age Nutrition Essential Serum (30ml airless pump bottle) for Face and Eyes is a crystal-like serum which quickly becomes one in the skin, delivering the power of its lipid replenishing and revitalizing properties. Skin regains density, glow and elasticity. It can be used as a massage in case of intense dryness. The product is fragrance-free and tested ophthalmologically.
